NEWSPAPER

TUESDAY, APRIL 18, 1884.

Several dwelling houses have recently been purchased by our citizens for their own use, showing a consciousness of the feeling of our business men to own their dwellings and to fit them up with neatness and good taste to gather about them the attractions of rural elegance and the delights of quiet life in our country in which a large proportion of dwellings are owned by the occupants as in this city, and thus we deem an element of strength, and highly promotive of the good appearance of the city, and of the social contentment and happiness of our people.

We like this course of our business men and we trust that all our citizens, mechanics and all others would secure to themselves a lot of land, and erect for themselves a dwelling, small as it might be, but firm, comfortable and economical, and thus we deem an element of strength, and highly promotive of the good appearance of the city, and of the social contentment and happiness of our people.

A correspondent thus calls attention to the metallic-like rings of eggs frequently found on trees:

Look out for them in your garden. During the last part of last summer a house wren deposited its eggs on the tender limbs of your apple and plum trees, some hundreds in a place. One of these eggs if left to remain will produce a caterpillar to prey on the foliage of your trees, they will be found a few inches from the tip of the shoot of last year's growth, packed closely side by side, and covered with a brown, spongy substance about an eighth of an inch in length, and from one third to three fourths of an inch in breadth. Caterpillars will readily eat them as the caterpillar of a cocoon. Now is the time to look them out and destroy them.

The Hallowell Gazette states that by an order of the Supreme Court of this State the daughter of Dr. M. C. Richardson of Hallowell, was returned to his charge on Tuesday last. This was a case where the grandfather persisted in retaining custody of a child against the wishes of the father. The case has been in court four or five half years, and has several times been decided in favor of the father, but the child has not been returned until this late day.

The season is backward and winter relaxes very slowly. The ice in the rivers is firm, and the springing in the interior quiet.

A friend recently from the Annapolis states that the snow has not perceptibly melted until the streams are all low, like mid-winter. Warm rain, he writes, will yield a very hard, some supply of water and about as much as the shore people will know how to dispose of.

The speech of Mr. Callahan of Tennessee, against the Nebraska bill, was a bold and effective assault upon the bill, and the author was not spared. It has produced more sensation than any other which has thus far been made on the same side in the House. Mr. Callahan is a very influential and able member, and his example will have a decisive effect upon the Southern members.

Both Eng and France have agreed not to use force of arms, for the present, at least, in their war with Russia. It does not follow, by any means, that Russia will not employ privateers, but, on the contrary, it is quite certain that the Emperor will do so, for the prize of English and French commerce is too rich not to tempt the employment of this kind of force.

The Legislature have had a smart contest over the purpose and obvious intent, wit, wit and humor, on the subject of taxing dogs, and have authorized a tax of three dollars on each dog, unless the dog shall be killed within three hours after notice. This will become a law unless stopped by a veto.

A propeller steamer of 250 tons has been constructed for, to be paged on the route from Worcester and Thompson to Boston, running alternately from the first two named places direct to Boston. She is expected to commence her trips by the first of July.

"Large Sales and Small Profits."—This is the principle thoroughly worked out by the Boston Dry Goods Store, 7, 9, 11, 13, 15, 17, 19, 21, 23, 25, 27, 29, 31, 33, 35, 37, 39, 41, 43, 45, 47, 49, 51,
